

## **Per Löfgren new sustainability manager at JM**

**Per Löfgren is the new sustainability manager at JM, as well as head of the quality and environment department within operations development. He will take on his new duties as of January 20, 2014.**

Per Löfgren most recently worked at IVL Swedish Environmental Research Institute, and he is also CEO of BASTA (an independent environment assessment system for building and construction products; JM was one of BASTA's initiators). JM was the first construction company to start assessing building supplies in terms of the environment back in the 1990s, and BASTA is an important component in these efforts today.

- "Per will be a powerful addition to our operations and to JM's continued development of sustainable urban planning. His background in building and environmental issues at IVL will greatly benefit these efforts," says Lennart Henriz, Quality and Environmental Director at JM.

Per Löfgren, Sustainability Manager +46 8-598 563 88 (as of January 20, 2014).

JM is one of the leading developers of housing and residential areas in the Nordic region. Operations focus on new production of homes in attractive locations, with the main focus on expanding metropolitan areas and university towns in Sweden, Norway, Denmark, Finland and Belgium. We are also involved in the project development of commercial premises and contract work, primarily in the Greater Stockholm area. JM should promote long-term quality and environmental management in all its operations. Annual sales total approximately SEK 13 billion and the company has approximately 2,200 employees. JM AB is a public limited company listed on NASDAQ OMX Stockholm, Mid Cap segment.
